Account Managers

Exceptional customer service is our goal. Brickform strives to exceed expectations by resolving issues on the first call. We have dedicated, knowledgeable Account Managers to help make your project a success from start to finish.

Technical Support

Have a technical or jobsite question? Contact a Brickform Technical Support Representative for more information at 1-833-45COLOR (1-833-452-6567).

At Brickform, we want to make sure you have the support you need. We are devoted to providing the most comprehensive information and education to architects, distributors, contractors, and installers.

Brickform works with dealers nationwide to sponsor hands-on demonstrations where installers are presented with the latest in products and techniques.

Technical information, tips, and color charts are all available on our website. Up-to-the-minute schedules of our latest product demos are posted. We participate in many local and international trade shows where we showcase new products, instructional videos, and demonstrations for attendees.

Our technical specialists are only a phone call away and are trained to answer your questions. Area Managers are also available for jobsite consultations.

Shipping & Traffic

Once you have placed your order, the Brickform team of logistics specialists take over to ensure that your order is packaged and shipped. These experienced professionals ship your order in the fastest, most economical way possible. You may also choose your own trucking company or company truck for your shipment.

Product Knowledge

Brickform understands your desire to know how our systems work. Our Area Managers can arrange accredited architectural presentations or product knowledge meetings.

Nationwide Sales Support

The Brickform Area Manager provides ongoing superior service. Brickform understands the meaning of quality support, so we have chosen Area Managers with the background, knowledge, and expertise to answer your questions quickly and correctly. Contact Customer Service at 1-800-483-9628 for the name and contact information for your local Area Manager.

Find a Contractor/Installer

Need help getting started on your dream project? Call 1-800-483-9628 to be referred to a Brickform distributor near you. Ask your local distributor to recommend a contractor who specializes in using Brickform decorative concrete products or visit myconcretecontractor.com.

Training

Brickform supports hands-on training and demonstrations across the nation, where installers are presented with the latest in product knowledge and techniques. In order to ensure the highest quality customer service, our Area Managers participate in these training sessions. More information available at Brickformtraining.com.

See how your favorite patterns and color combinations work with your home, from the convenience of your tablet or phone. Best of all... It's **FREE** to download and use.

Once you've installed the Brickform StampApp on your tablet or phone, scan the above image from within the app to get started. If you would like to experience the full-size, 10'x10' augmented reality slab, just fill out the form available at www.stampapp.net

Engineered Texturing Systems

The Brickform system of Texture Mats has introduced a whole new level of creative expression to decorative concrete. Precision engineered tools make possible a high degree of controlled creativity, making it possible to mimic and even enhance the look and feel of natural stone and many other surfaces. Anything from finely tooled slate to perfectly set cobbles, BRICKFORM has the tools to make it happen, with absolute control.

Largest Selection and Best Value

Pattern

Brickform manufactures the world's largest selection. Over 175 patterns in stone, slate, brick, and even wood textures are available.

Texture

Over 30 textures have been designed to recreate the look and feel of natural materials. All tools, including random fieldstone, coarse wire-cut brick, heavily textured stone, and Mexican tile, are created with strict attention to detail.

Precision and Durability

The resilient material used to create each texture is designed to retain pattern "memory." Consistent, well-defined, uniform texture is transferred, in every detail, onto the concrete surface-imprint after imprint.

Our company is dedicated to the precise and unsurpassed consistency of each and every texturing tool. Strict standards are maintained so every tool is tight-fitting, reducing pattern lines and unsightly ridges.

Each tool is crafted from a high-quality polyurethane material that is flexible, yet retains high-tear-strength. Sturdy handles are carefully placed according to tool-weight distribution to improve balance and maneuverability.

Disclaimer - All measurements are nominal. Skin and texture mat measurements are based on the Brickform mold size. Urethane has a natural tendency to shrink or expand, depending on environmental factors. This does not affect how the mats fit together.

Seamless Texture Skins

Standard-Flexible

Brickform Seamless Skins are made with a unique feathered edge that allows for a seamless texture with no start or stop point. Brickform Texture skins are available in 3 styles:

- **Ultra-Flexible**, for tight angles or rounded surfaces
- **Classic Flex**, an all-purpose use skin flexible enough to work around obstacles, yet stiff enough for the whole job
- **Standard Flex**, which is rigid enough to get on the slab at the optimum time

Mix and match or just choose one. Brickform has a skin that fits every need.

**60"x60" available in Limestone, Rough Stone, Heavy Stone, Sierra Seamless, and Desert Slate only*

See page 100 for Vertical Mix skins and tools.

Seamless Skins

Brickform Seamless Skins™ are feathered-edged skins that produce continuous texture with no grout or joint lines. Brickform texture skins are available in ultra-flexible, classic flex, and standard flex materials, all designed with unsurpassed quality. Seamless skins are compatible with Brickform Stampable Overlay.

Rough Stone Texture (C)

A natural stone texture characterized by a continuous coarse surface with several distinguishing veins.

See page 15 for ordering information.

Blue Stone Texture (A)
A natural stone surface with a sandy texture that includes clefts which leave a layered appearance.

Limestone Texture (B)
A natural stone surface, similar to Veronica Stone but with a finer texture.

Heavy Stone Texture (D)
A rough, natural stone surface containing chips, fractures, pockmarks and veins.

Sanded Slate Texture (E)
Similar to our slate texture with the addition of a lightly sanded appearance across the entire texture field.

Renaissance Slate Texture (F)

A natural stone surface with a slight sandstone texture that includes various veins, typically running in a similar direction.

See page 15 for ordering information.

Chiseled Slate Texture (G)

A naturally laminated stone texture, split along parallel planes, hand-tooled to create a chipped, fragmented look.

Yucatan Texture (J)

A stone surface consisting of deep chips, pits and fractures creating a continuously undulating texture.

Roman Slate Texture (H)

A sanded slate stone surface that utilizes dips, ridges and veins to create a continuously changing texture across the entire surface.

Original Roman Slate Texture (I)

A smooth slate stone surface that utilizes dips, ridges and veins to create a continuously changing texture across the entire surface.

Sierra Seamless Texture (K)

A natural stone texture with an ocean-worn surface that combines rough, heavy, stone appearance with water-washed ridges, veins and clefts.

Texas Sea Shells (N)

Random pieces of sea shells and coral of various sizes, shapes and types laid in a random fashion over a field of sand.

See page 15 for ordering information.

Rocky Mountain Stone Texture (L)
A natural stone surface that incorporates a rough, uneven texture with naturally etched veins and ridges.

Veronica Stone (M)
The design is similar Bush Stone, and appears to be created by a mason's bush hammer with a pitted and irregular surface.

Smooth Slate Texture (O)
A naturally laminated stone texture, split along parallel planes, creating an uneven surface that incorporates various veins and ridges.

Desert Slate Texture (P)
A simulated slate texture that combines numerous clefts and irregular surfaces to create the ideal concrete impressions.

Casa Rubia (Y)

A unique hand-chiseled texture that yields a thatch-like appearance. Great for pool decks.

See page 15 for ordering information.

Elk Mountain Texture (Q)
A consistent light stone texture, making it appealing for indoor and outdoor applications.

Elk Mountain Texture (veined) (R)
A light stone texture with well-placed fractures, making it appealing for indoor and outdoor applications.

Regal Ashlar Slate (S)
A robust texture, with constantly changing ridges that bring a majestic and noble look to any surface.

Cracked Mud (T)
A bold, daring, natural earth texture with a surface that looks and feels real.

Lunar Rock (U)

An out-of-this-world look that will transform any hardscape. The surface boasts a meteor shower of texture with a variety of impacted stones.

Super Slate (V)

A blended slate pattern with enhanced highlights.

Sidewalk Stone (W)

A rustic blend of soft and strong textures, giving a traditional feel to any surface.

Riviera Texture (X)

A naturally laminated stone texture, split along parallel planes, creating an uneven surface that incorporates various veins and ridges.

How To Order Texture Skins

Select the characteristics of your Texture Skin by choosing one option from each section and entering the order number or letter in sections A through E. Then build the part number.

Slate Texture Mats

Slate is a sleek, metamorphic rock with fine veining patterns. The grain pattern of slate makes it a common resource for tile flooring because it is easily split into thin sheets. Brickform slate texture tools recreate the elegant, clean design of slate without the expense and hassle of installing fragile natural stones. Brickform Ashlar texture mats reflect the handcrafted, intricately-fitting stones of historic Ashlar configurations.

Bridges of Madison County

Deep in the American heartland reside the historic Bridges of Madison County. Subject of the eponymous novel, film, and musical, they are now the inspiration for Brickform's newest line of textures. These stamps were derived from real planks and timbers dating back to the late 19th century.

Creative Images Texture Mats

Brickform developed the Creative Images line of texture mats to incorporate the latest in textures, designs and usability. Creative Images mats are larger, an average of nine square feet, which means fewer placements and less touch-up work. Creative Images mats are made of firmer material, which allows you to begin stamping sooner. Choose Creative Images to create the best possible impression with the least amount of effort.

Urethane Ultra-Liners

The next generation in cantilever bullnose forms is the Brickform Urethane Ultra-Liner. The new liner has been re-engineered from the ground up to give the Brickform contractor a competitive edge when it comes to step faces, wall caps, countertops and pool copings.

- Made with a durable and dependable urethane system that will let you use them time and time again with the same quality results as the first use.
- Straight or curving around corners, these liners maintain their shape on even some of the sharpest turns.
- Solid urethane skin is rigid and strong without distortion; while a light-weight, high-density core keeps these forms flexible to contour to almost any shape.
- Non-porous face will not draw out moisture from your concrete and will leave a smoother face, reducing your finishing time.

Foam Urethane Ultra-Liners

With the contractor in mind, Ultra-Liners take the hassle out of decorative step faces.

- Reusable liner for steps, wall caps and counter-tops
- Creates smooth and easy-to-finish surfaces
- Foam urethane, long lasting liners
- Easy to bend and mold into shape
- Sized to dimensional lumber
- Offered in approximate 4' and 8' lengths for versatility and reduced shipping cost
- Works great with Brickform Liquid Release

*Lengths of Ultra-Liner tools are approximate, measured before placement. Sold 10 per case.

**Also available: Twist-to-break wire kit (SL-2950), double-sided tape (SL-2975)

Step-Liners

Brickform Step-Liners are designed to produce texture on the edges of concrete steps, risers, terraces and even concrete countertops. These Step-Liners can be reused many times. Simply attach the liners to your riser forms to impart the beauty of natural stone. They have no top or bottom and can be reversed to reduce pattern repeat. Brickform Step-Liners are high-quality, flexible polyurethane, engineered to be lightweight and extremely durable.

Stone Faced 2" Cantilevered Step Liner

Brickform is excited to introduce our new one-piece, Stone Faced Cantilevered Step Liner. Perfect for cast concrete stairs, this tool has a rough, natural stone face with a dramatic cantilever that continues to additional stone texture on the riser. Designed for greater ease of use, this tool comes in a single piece, meaning less work and difficulty for installers.

Add new dimension to your next project featuring stairs by using the new Brickform one-piece cantilevered step liner.

Brickform Pounders

Find the pounder that is right for you and your job. The redesigned aluminum-handle pounder is ready to use right out of the box, with an internal spring system that absorbs shock, reducing the transfer to your hands. Increased side impact/miss strike recovery keeps the energy moving down, instead of off-center. Of course, you can't forget about the popular Original Brickform Pounder that has a rigid head and fixed placed handle. Two great pounders to achieve optimum detail on the concrete surface.

A.	FP-100	Fiberglass Handle	10" x 10"	19 Lbs.
B.	FP-200	Fiberglass Handle	12" x 12"	20 Lbs.

Restore, refresh, or redo with Brickform Cem-Coat. Use Cem-Coat to color smooth and lightly-textured concrete surfaces. Correct color mistakes, restore faded or damaged color, and add fresh color to old and new slabs alike. Use an airless sprayer for vertical applications. When applied in thin coats, Cem-Coat will provide brilliant color that will stand the test of time. Cem-Coat is a vital tool for decorative and colored concrete restoration.

Cem-Coat is a richly colored, opaque cementitious paint-like product that can be applied to any cementitious surface. Cem-Coat can be stained and antiqued using Brickform Antique-It. It is UV-resistant and resistant to fungus and mildew, making it great for outdoor applications. Cem-Coat is available in all of the Brickform Standard Colors. Custom color matching is available.

For more heavily textured surfaces, consider using Brickform FreestylePRO.

Brickform Antique-It Antiquing Agent

Antique and highlight without the dust. Brickform Antique-It is a fast and easy way to antique stamped and textured concrete. Use Antique-It to rejuvenate a tired old stamped concrete job that has lost its antiquing. When stamping with liquid release, use Antique-It for the appearance of a traditional powdered release agent.

Antique-It is a water soluble antiquing agent designed to impart a secondary color for an antiquing or mottling effect. It is easy to apply and fast drying, applied using a pump-up sprayer or brush. Antique-It can be used over integral color, Color Hardeners, Stampable Overlays, and Brickform Cem-Coat. Antique-It is available in all of the Brickform Standard Colors with custom color matching available.

DAY1TM

DAY1 FINISHING AID is a colloidal silica-based topical additive that makes concrete flatwork finishing easier and faster. It produces a better result and reduces the risk of a prematurely setting slab. Applied during floating and troweling, DAY1 increases cream, making for easier, better finishing and extended workable time under adverse conditions. DAY1 does not alter the water to cement ratio. It provides moisture-retention performance similar to a liquid membrane forming curing compound. DAY1, however, becomes a permanent part of the slab so there is no membrane or residue to remove.

DAY1 also has a number of densification and performance enhancing qualities. Through densification, compressive and surface abrasion resistance are improved. Additionally, DAY1 improves consolidation, reduces water vapor transmission, and extends curing, further improving strength and durability. DAY1 has been shown to successfully mitigate slab curling by reducing evaporation at the surface, thereby diminishing the shrinkage differential and the curling it causes. DAY1 also minimizes the potential for checking, crazing, and other drying-related surface issues.

DAY1 reduces the potential for efflorescence on both colored and non-colored concrete mixes. It also gives the concrete surface hydrophobic-like properties for better resistance to liquid penetration and staining. This makes it a must-have for any colored or decorative concrete project.

DAY1 offers a multitude of advanced features and benefits for freshly-placed concrete, and provides long-term high performance properties to treated concrete surfaces:

FINISHING AID

- Designed to improve workability under hot, dry, & windy conditions & will save a slab
- Reduces operator fatigue and trowel wear
- Aids application of shake-on hardeners in low bleedwater environments
- Helps finish high performance concretes
- Concentrate and ready-to-use formulas

HARDENING & DENSIFICATION

- Increases abrasion & impact resistance
- Increases surface compressive strength
- Creates a denser, less-permeable surface for resistance to liquid penetration

CONCRETE CURING

- Retains moisture in the slab during curing
- Reduces water vapor transmission (MVER)
- Mitigates volume of water vapors

EFFLORESCENCE & SURFACE DEFECT

- Reduces calcium hydroxide $\text{Ca}(\text{OH})_2$ migration
- Reduces efflorescence on both colored & non-colored concrete
- Minimizes checking, crazing & scaling
- Decreases potential for alkali silica reaction (ASR)
- Ideal for all colored and decorative concrete applications

CURLING REDUCTION

- Reduces potential for slab curling

Liquid Release

Colorless Bond-Breaker for Stamping

Brickform Liquid Release is a colorless bond-breaker, formulated and recommended for use with all Brickform Texture Mats and with many other architectural concrete texturing systems. Brickform Liquid Release forms a lubricating barrier that prolongs the life of the imprinting tools by decreasing the friction between the mats and the concrete.

Brickform Liquid Release is used in the texturing process of both colored and uncolored concrete. It is also used as an alternative to powdered release agents that may not be desirable in certain circumstances, such as interior projects. Brickform Liquid Release should be considered for use on projects that are to be textured but colored later, with Brickform Antique-It, Cem-Coat or Blush-Tone Acid Stain, after the concrete has cured.

- Prevents mats sticking to concrete
- Easy-to-apply liquid
- Prolongs tool life
- Interior/exterior use
- Apply with sprayer
- Solvent-based

- LR-1 1-Gallon Can
- LR4-1 Case of four 1-Gallon Cans
- LR-5 5-Gallon Can

Day1 is an incredible finishing aid by itself and works great with the revolutionary concrete tools from Superior Innovations, Inc. The high frequency vibration from the MagVibe Pro helps embed Day1 into the surface for a consistent coverage. The battery powered back pack sprayer can shoot up to 30 feet and can apply 50 gallons on one charge. I am so confident in our tools that I offer a 30 day money back guarantee. If you are not completely satisfied after 30 days, I'll buy it back. - Scott Brening

Surface Deactivator

Surface Deactivator by Solomon Colors makes exposed aggregate finishes easier and more consistent. It is typically applied to freshly placed concrete to prevent cement paste hardening and achieve more controlled exposed aggregate finishes. Unlike sugar-based retarders with uncertain levels of retardation, Surface Deactivator selectively halts the hydration process down to a controlled depth. Ten predetermined depths of exposure are available, color-coded for identification, to provide consistent, repeatable cement paste removal and aggregate reveal.

Surface Deactivator can also be applied to newly-placed concrete that is specified for diamond polishing. It softens surface cement paste, reducing heavy grinding stages up to 75%.

Brickform Blush-Tone Acid Stain Chemical Stain for Concrete

Brickform Blush-Tone Acid Stain reacts with minerals that exist in newly cured or existing concrete. It penetrates the very top layer of the concrete surface with color that will not chip, crack, or peel. The colors produced in each section of concrete will be unique with captivating, multi-colored intensities that become a permanent part of the concrete. Brickform Blush-Tone Acid Stain is available in 10 standard colors.

Brickform E-Stain

Brickform E-Stain is a water-based formulation containing reactive mineral compounds and proprietary admixtures. Brickform E-Stain contains no hydrochloric acid, making it more environmentally friendly. Brickform E-Stain is ideally suited for use in the Micro-Topping, SM Professional Grade, Stampable Overlay, and cast-in-place concrete.

Brickform E-Stain

Reactive Stain for Concrete

Brickform E-Stains are penetrating, reactive stains that produce unique color effects in finished cementitious surfaces, simulating the natural shadings and aged appearance of stone or masonry. The color effect is unique to each stained surface and cannot be duplicated with other materials. Brickform E-Stain chemically reacts within the concrete substrate, slightly etching the concrete surface to provide deeper and more permanent color.

The color intensity of the stain can be reduced by blending the stain with E-Stain Plus. Special colors can be produced by blending two or more colors together.

Lythic Products

Lythic Protector

Lythic Cleaner

Densifier & XL Concentrate

Densifier & XL RTU

By popular demand, Densifier and XL Densifier are available in concentrate and Ready-To-Use formulas. In the new green labels, the RTU formula is the quick and convenient way to apply Densifier and XL Densifier. The standard concentrate formula, in the red label, is a 4:1 concentrate, easy to store and ship.

Lythic began with the discovery of reactive Colloidal Silica as a new way to add strength and durability to concrete floors, by two veterans of concrete polishing in 2004. Intimately familiar with the advantages of exposed concrete floors, both polished and unpolished, they were also acutely aware of the drawbacks of the existing chemistry available. They recognized the benefits of this advance in concrete densification chemistry as they used it for their own projects. From this direct experience, new products and processes were developed and have expanded possibilities for concrete floor finishes. Lythic is unique in providing expertise in product and processes that are advancing concrete flooring beyond the costs, risks, and limitations of polished concrete floors.

Lythic offers a comprehensive line of Densifiers, Protectors, and Cleaners for polished concrete floors. For more information, reference the Lythic catalog or visit www.lythic.com

Polishing Systems

The Lythic Polishing System is a simple, cost effective and environmentally friendly line of products designed to enhance, protect and beautify existing concrete floors with concrete polishing.

Brickform Pro-Dye PLUS

Penetrating Stain for Concrete

Brickform Pro-Dye PLUS has been reformulated to a liquid form and is now easier to use than before. Pro-Dye PLUS is available in the same 25 standard colors and produces the same beautiful results. Pro-Dye PLUS penetrates the surface of concrete, creating a layer of translucent color that dries quickly and will not chip, crack, or peel. Pro-Dye PLUS is packaged in liquid form to be mixed in proportion with acetone or water. Pro-Dye PLUS is designed to work with the Lythic Polishing System for the coloring process in polishing floors. Pro-Dye PLUS mixed with acetone is also excellent in vertical applications, stencils, and logos because it dries quickly. Pro-Dye PLUS colors are vivid with unique multi-colored intensities, similar to the mottling effect of acid stain. Colors can be combined to create an unlimited number of color variations.

Finishing & Maintenance

E-Etch

Brickform E-Etch is an environmentally friendly industrial strength floor cleaner, degreaser and light etching product. It is ideal for cleaning and preparing cementitious surfaces for acid staining, decorative overlays, water-based stains, and coatings applications. It may also be used on concrete, stucco, terrazzo and most masonry surfaces to open up the pores on the surface and clean grime, dirt, grease, scuff marks and stains. E-Etch effectively removes excess Antique Release from textured concrete and can also be used as an efflorescence remover.

- Biodegradable
- Rinse with water
- Non-hazardous
- Non-abrasive
- Non-carcinogenic
- Antique Release/

Evaporation Retarder

Extends Working Time for Coloring And Stamping

Brickform Evaporation Retarder is formulated to be V.O.C. compliant. This water-based film minimizes the evaporation of water from the surface of newly placed concrete, extending both workability and finishing time. Brickform Evaporation Retarder comes in an odorless concentrate that is mixed with water, making it economical and environmentally friendly. Brickform Evaporation Retarder will not affect the final cure and concrete strength.

- Economical
- Easy to apply
- Interior/exterior use
- Apply with sprayer

Neutra Clean

BRICKFORM pH neutral cleaner is a cleaning and neutralizing agent engineered for use on acid and reactive stained floors prior to sealing and to remove light oil, grease or other types of soils from colored, imprinted and natural concrete surfaces. This product combines cleaning and light degreasing without the use of petroleum solvents and effectively loosens residues from the staining process, as well as loosening release powders from stamped concrete.

Resurfacing Products

BRICKFORM resurfacing products quickly rejuvenate concrete surfaces without disruption or high cost.

Brickform Stampable Overlay Concrete Overlay

Brickform Stampable Overlay "White" is a single component (add water only) blend of white cement and special materials that forms a thin, concrete coating. Brickform Stampable Overlay is specially designed to work with Brickform Overlay Liquid Colorant. Brickform Stampable Overlay is easy to install and forms a tough, durable topping that will withstand years of wear. When used on properly prepared surfaces, Brickform Stampable Overlay will permanently bond to concrete surfaces.

- Creates a new 1/4" to 1/2" surface
- Use with overlay liquid colorant
- Durable
- Use with Triple Seven Bond Coat

SC-60 60 lb. bag (White Mix)

For use with Overlay Liquid Colorant and Liquid Release only

Brickform Stampable Overlay "Gray" is a premixed blend of special materials that, when mixed with water, forms a thin, concrete coating. This overlay is intended for use with Color Hardener and Antique Release.

- Creates a new 1/4" to 1/2" surface
- Can be textured & colored
- Durable
- Use with Triple Seven Bond Coat

OL-60 5 Gallon Bucket (Gray Mix)

For use with Color Hardener and Antique Release only

Brickform Micro-Topping Smooth Grade

Brickform Micro-Topping is used on interior or exterior cured concrete to create a durable surface that can be colored or stained. It is available as a white or gray dry powder in smooth grade, and mixed with BRICKFORM Liquid Polymer. The smooth grade is applied over SM Professional Grade for a smooth finish when desired. The mixed materials form a thin concrete coating that can be used to restore or repair any concrete surface.

- Creates a new surface
- Can be colored & stained

Brickform Triple Seven Bond Coat
Primer for Cementitious Overlays

Brickform Triple Seven Bond Coat prevents the concrete from absorbing water from the overlay material, making it easier to spread and achieve a smooth surface. Triple Seven Bond Coat is a reactive primer, remaining active for at least two hours after it is applied. Triple Seven Bond Coat increases the bond strength by creating a more efficient chemical link between the concrete and the overlay.

Premium Sealers

BRICKFORM sealers bring out the natural beauty of the textures and color unique to a decorative surface. These superior, durable sealers also protect the finish from sun damage, yellowing, scuffing and premature wear.

HIGH PERFORMANCE SEALERS

UreMax WB

Brickform UreMax WB is a two-part, matte-finish, water-based polyurethane that forms a high-solids coating. UreMax WB preserves and protects any above-grade concrete, masonry or stone. It is the most durable, chemical-resistant barrier coating of the Brickform sealers, without the odor typically found in solvent-borne sealers. Formulated to seal and protect concrete and masonry that is subject to heaviest use conditions, Brickform UreMax WB is chemically resistant and highly durable.

Poly-Astic®

Premium, High-Build, Poly-Aspartic Sealer - Zero VOC

Brickform Poly-Astic is a two-part high-solids, high-build sealer designed for interior use on concrete or masonry surfaces. Poly-Astic allows for single coat high-film thickness in a water-clear finish. Poly-Astic provides a very smooth, mirror-like finish not attainable with any other product.

- Non-yellowing, crystal clear
- Interior use only
- Enhances color
- Easy to apply

DecoPoxy

DecoPoxy is a water-based, low VOC, penetrating epoxy coating that has been specifically formulated to protect interior cementitious floors for commercial and residential applications. It provides high gloss, wear and chemical resistance, and an easy-to-maintain finish, while bringing up the full depth of color on acid stained or decorative floors.

- Helps prevent delamination
- Non-flammable, low-odor and toxicity
- Superior chemical resistance
- Easy to recoat

PENETRATING SEALERS

Stealth-Seal

Brickform Stealth-Seal is non-film forming water and oil repellent that effectively protects and preserves the natural appearance of any surface. It works by creating an invisible barrier at the surface level through a chemical reaction between the sealer and the cement paste, allowing vapor transmission while strongly repelling water and oil. Stealth-Seal is ideal for any surface that needs protection from stains and the elements. Apply to natural materials, concrete and any cementitious surface.

Stealth-Seal Premium

Brickform Stealth-Seal Premium will repel water and oil more effectively, has greater stain resistance, and has 50% longer service life than regular Stealth Seal.

CURE & SEALS

Gem Cure & Seal

Gem Cure & Seal is a medium- to high-gloss, solvent-based, clear acrylate co-polymer curing compound, dust proofer and sealer. Gem Cure & Seal minimizes moisture loss from evaporation in newly placed concrete to provide maximum strength, hardness and protection. Reducing water evaporation loss will result in a stronger, denser, more durable concrete with higher compressive strength and better crack and freeze-thaw resistance.

Satin Cure & Seal

Satin Cure & Seal is a water based, clear acrylic co-polymer curing compound, dust proofer and sealer. Satin Cure & Seal minimizes moisture loss from evaporation in newly placed concrete to provide maximum strength, hardness and protection. Reducing water evaporation loss will result in a stronger, denser, more durable concrete with higher compressive strength, and better crack and freeze-thaw resistance.

SOLVENT-BASED SEALERS

Gem-Seal

High-Gloss Sealer -
700, 400 or 100 VOC

Brickform Gem-Seal is a high-gloss, solvent-based, non-yellowing sealer. A light coating of this UV-resistant sealer will protect and enhance colored and textured concrete. Use Brickform Gem-Seal on porous concrete and masonry to form a shield against stains and mildew.

- Non-yellowing, crystal clear
- Dries to a "wet-look" finish
- Interior/exterior use
- Enhances color

Poly-Seal

Medium- to High-Sheen Sealer -
650, 400 or 100 VOC

Brickform Poly-Seal is a medium-to-high sheen, solvent-based, super-tough acrylic sealer that is easy to clean and maintain. Poly-Seal protects with a UV-resistant coating that penetrates the surface to retard efflorescence and resist oil, grease and food stains.

- Non-yellowing, crystal clear
- Medium-to-high sheen finish depending on porosity of surface
- Interior/exterior use

Poly-Tint **NEW**
650, 400 or 100 VOC

Brickform Poly-Tint is a pre-tinted, solvent-based sealer with a medium to high gloss. It has the same great protection and color enhancement found in Brickform Poly-Seal. But, it also has a precisely added tint for translucent color enhancement without overall appearance change. The product beautifully colors existing concrete in subtle grey or brown shades making it perfect for quick color correction, adding color to non-colored concrete, and enhancing weak color.

- UV Resistant
- Pre-Tinted
- Enhances Color
- Retards Efflorescence
- Resists Freeze-Thaw

Safety-Seal

With Traction-Grip, Low-Sheen Sealer
400 VOC or 100 VOC

Brickform Safety-Seal is designed to be slip-resistant and is ideal around pool decks and areas where water or moisture can accumulate. Safety-Seal is a solvent-based sealer that protects concrete surfaces from stains and mildew. Brickform Safety-Seal dries to a beautiful matte finish that is UV-resistant.

- Dries to a low-sheen finish
- Interior/exterior use
- Micronized slip-resistant additives

* See pg 108 for part numbers.

WATER-BASED SEALER

Brickform Satin-Seal® for use with overlays Satin-Finish "Natural-Look" Sealer - 100 VOC

Brickform Satin-Seal is a non-flammable product, designed to protect concrete with a satin finish. This water-based acrylic VOC-compliant sealer reduces the effect of efflorescence on porous surfaces, while forming a non-yellowing, scuff-resistant finish that resists moisture penetration.

- Non-yellowing satin-finish
- Interior/exterior use
- Scuff-resistant

* NOT RECOMMENDED FOR DECORATIVE APPLICATIONS SUCH AS STAMPED, STAINED OR DYED CONCRETE. Please review the TIS at www.Brickform.com for applications and guidelines.

SEALER STRIPPER

Strip-It

Brickform Strip-It is an environmentally sound and user-safe stripper for water and solvent-based sealers and paints. Strip-It may be used on all masonry surfaces including concrete, quarry tile, ceramic tile, terrazzo, cementitious overlays and other surfaces. Strip-It meets 2005 California Air Resources Board VOC standards (less than 50% VOC by weight).

- Non-flammable
- Contains no methylene chloride

** See pg 108 for part numbers.*

MAINTENANCE

Brickform Premium Acrylic Floor Finish

Brickform Premium Acrylic Floor Finish is a finish that forms a long-lasting protective coating over a Brickform sealer. It provides a wear-resistant sacrificial coating and stands up to the heaviest of traffic conditions. It is easily applied and can be re-coated up to 100 times without having to strip the floor. It will not powder and it can be mopped or cleaned time after time without damaging its original shine. Brickform Premium Acrylic Floor Finish is ideal for ongoing maintenance.

- Super-tough film
- High-gloss
- Interior use only
- Slip-resistant

SEALER ADDITIVES

Tinta' Seal Color tint pack additive for solvent-based sealers

Tinta' Seal can enhance and correct the color of existing cementitious surfaces such as integral color concrete, stamped concrete, overlays or plain concrete. The Brickform Tinta' Seal tint packs are designed to be used with any of our solvent base sealers including Gem Cure & Seal. It is packaged in a 16-oz can that is mixed onsite with a 5-gallon pail of either Gem-Seal, Poly-Seal or Gem Cure & Seal.

Color chart located after page 76

Traction Grip

Traction Grip is an anti-slip micronized powder that adds texture to decorative sealers (Brickform Gem-Seal, Poly-Seal, and Satin Seal). The lightweight, spherical shape and clarity gives Traction Grip its specific properties. Applications include inclined driveways, garages, steps, patios and pool decks.

- No sharp edges
- Disperses easily
- Does not affect color

Matte-Magic Gloss Reducing Additive

Brickform Matte-Magic is a powdered flattening agent additive for Brickform solvent based sealers. The original topcoat gloss is reduced based on the amount of additive used. The finished gloss reflectance can be varied from semi-gloss to satin. Matte-Magic comes in 16-oz units, with cases of 8 units. Each unit is added to a 5-gallon sealer for gloss reduction.

- Effectively reduces gloss
- Easy to measure and mix
